

Mechanics & Industry

An International Journal on Mechanical Sciences and Engineering Applications

Mechanics & Industry publishes original papers from industry, R&D departments and academic institutions. Articles are related mainly to fluid and solid mechanics as they apply across the fields of science in mechanical, civil, chemical or bioengineering.

The journal acts as an interface between research and industry, coordinating and disseminating scientific and technical mechanical research in relation to industrial activities.

Key Elements

Rigorous peer review

Strict ethical policies following the COPE code of conduct

Rapid publication: from acceptance to publication \approx 45 days

An Editor's selection of articles published in free access

Author services: performant search engine, article metrics, bookmarking...

No page charges

Reader services: free e-mail alerts and RSS Feeds, CrossRef® and DOI

Editor-in-Chief
Prof Régis DUFOUR
INSA Lyon, France
LaMCoS-UMR CNRS

Mechanics & Industry issues include:

- full-length original contributions
- review articles
- technical briefs

Submit an article - Sign up for e-mail alert
